DETAILED ACTION

Priority

1. Applicant should update the priority statement.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 44-51 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-10 of U.S. Patent No. 5,736,425. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims overlap in that '425 claims specific polyols as the first solvent, and the instant application claims polyols in general.

4. Claim 43 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-2 of U.S. Patent No. 5,807,607. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims overlap, in that the instant application claims a polyol as the first solvent, and '607 claims glycerol or a polyol that is not glycol.

5. Claim 44 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 5 of U.S. Patent No. 5,807,607. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims overlap, in that the instant application claims a polyol as the first solvent, and '607 claims glycerol.

6. Claim 44 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 33 of U.S. Patent No. 5,955,140. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims overlap, in that the instant application claims a polyol as the first solvent, and '607 claims glycerol.

Allowable Subject Matter

7. Claims 52-55 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
